

Eunice Kennedy Shriver National Institute
of Child Health and Human Development

Position Title: Retrotransposon L1 and the host factors that restrict its integration

Position Description: A postdoctoral position is available to study how retrotransposon L1 is restricted by factors that defend the genome. Having a long-standing interest in how TEs impact the biology of the host, we also study the activation of retrotransposons in fission yeast and how integration results in adaptation to stress. Further details and a list of publications can be found at:

<https://science.nichd.nih.gov/confluence/display/sete/Home>

Interested candidates must have a Ph.D. and/or an M.D. and have a strong background in molecular genetics. Skills in bioinformatics are also desirable. To apply submit a cover letter, curriculum vitae, bibliography, and names of three references to:
